Flash Point: 80 Degrees F

Suitable Extinguishing Media: Use water spray, alcohol resistant foam, dry chemical or carbon dioxide.

Unsuitable Extinguishing Media: High volume water jet.

Specific Hazards during firefighting: Do not use solid water stream as it may scatter and spread fire. Cool closed containers exposed to the fire with water spray. Flash back possible over considerable distance. May form explosive mixtures in the air. Exposure to decomposition products may be hazardous to health. Carbon oxides. Silicon oxides.

Hazardous Combustion Products: Carbon oxides; silicon oxides.

Specific Extinguishing Methods: Use extinguisher measures that are appropriate to local circumstances and the surrounding environment. Use water spray to cool unopened containers.

Further Information: Collect contaminated fire extinguisher water seperately. This must not be discharged into drains. Fire residues and fire contaminated fire extinguisher water must be disposed of in accordance of local regulations.

Special Protective Equipment for Firefighters: In the event of a fire wear self contained breathing apparatus. Use personal protective equipment.

ACCIDENTAL RELEASE MEASURES

Avoid contact with eyes. Do not discharge into drains. Use personal protective equipment recommended in Section 8. Ventilate area and wash spill site after material pickup is complete. Non-sparking tools should be used.

HANDLING AND STORAGE

Handling Precautions: See section 8 for recommendations on the use of personal protective equipment. Keep away from sources of ignition. Handle with care and avoid spillage on the floor (slippage). Do not expose containing...
to open flame, excessive heat, or direct sunlight.

**Storage Requirements:**
Keep away from incompatible materials (section 10). Take measures to prevent the build up of electrostatic charge. Keep container tightly closed and properly labeled. Keep away from heat, sparks, and flames. Store in cool/dry area.
